
Cal-Am™

27% N 8% Ca

***The flexible alternative for
nitrogen application***

The benefits of Cal-Am

- 50% of the nitrogen is in the plant available nitrate form, for a quick response even in cool conditions.
- 50% of the nitrogen is in the ammonium form, for a sustained response.
- Lower risk of volatilisation losses than with urea.
- Cal-Am supplies additional calcium, an important nutrient for plant health.

CAUTION

This product attracts moisture, use as soon as possible after bag is opened, store in a dry place
