

# Mount Isa Acid Plant

- ▶ The Sulphuric Acid Plant at Mount Isa collects, then cleans sulphur dioxide before converting it first to sulphur trioxide, then to liquid sulphuric acid. The liquid acid is then railed to Phosphate Hill in specially designed GATX wagons.
- ▶ The Sulphuric Acid Plant has the capacity to produce 3,700 tonnes per day and is committed to producing it without harm to people or the environment.
- ▶ Mount Isa Acid Plant employs approximately 40 personnel on site.
